PROFESSIONAL SUMMARY

A highly motivated, self-starting developer seeking to launch a career building web applications and services. Developed an acute ability to connect and communicate with people from working over 25 years in the service industry. It is this connection with others and a love of problem solving that spurred a career change to something more challenging and personally rewarding. This, coupled with a familiarity with development and deployment process of many web-based technologies, provides a unique and robust set of skills to any endeavor.

SKILLS

- Javascript
- Ruby
- HTML / CSS
- Relational Database Design
- Object-Oriented Design
- API Design Knowledge
